### Cases of COVID-19 on the rise in Montgomery, Greene and Warren counties; compliance with safety protocols CRITICAL

Statewide figures show the Dayton area is seeing the largest growth in cases of COVID-19, and new cases are being reported every day in Montgomery, Greene and Warren counties. On Friday, the *Dayton Daily News* reported that Warren County is

reporting a rapid increase in COVID-19 spread, while yesterday, two new cases were reported at a childcare facility at Wright-Patterson Air Force Base. Today, four new cases were reported among staff at a nursing home in Centerville.

It's more important than ever that **each and every one of us follow the safety protocols** recommended by the Ohio Department of Health and the Ohio Department of Developmental Disabilities, and that we **practice social distancing in our personal and professional lives**. **The people we serve depend on us**.

MCBDDS staff will be making random, unannounced visits to homes and day services locations throughout the County, and will issue UIs if masks are not seen on staff, or if staff are not following guidelines. Please ensure that your staff are complying with all protocols.

If you need supplies to ensure folks' safety, please contact our Pandemic Resource Center at providerhelp@mcbdds.org or 937-457-2808. We have plenty of supplies on hand, and will be happy to provide them to you/your agency.
